

HOW TO OPERATE YOUR BATTERY

Guide for The Clear 510 Thread Variable Voltage Battery

1. Turn it on or off.

To turn the battery on, click the button on the battery five times. To turn the battery off, click the button five times.

2. Two clicks to pre-heat.

Attach your cart to the battery and click the button two times. This warms up the oil to 1.8 volts to get it ready for a great first hit or if it's cold.

3. Three clicks to white, press down & draw.

The white color is 3.0 volts. The lower voltage preserves the flavor and burns less cannabinoids. Great for ENDO or Classic carts.

> 4. Three clicks to yellow, press down & draw. The yellow color is 3.6 volts for a larger hit and bigger plumes of vapor. Great for Elite carts.

WARNING: Overconsumption of Marijuana Concentrate may lead to Psychotic symptoms and/or Psychotic disorder, Mental Health Symptoms/Problems, Cannabis Hyperemesis (CHS), and Cannabis use disorder/dependence, including physical and psychological dependence.
