

THE CLEAR™

QUALITY CONTROL

9 POINT INSPECTION

1&2

HARDWARE

We test our hardware for heavy metals and contaminants in empty and filled cartridges and the vapor produced. We make sure there are never any cutting agents, fillers or Vitamin E acetate.

TERPENES

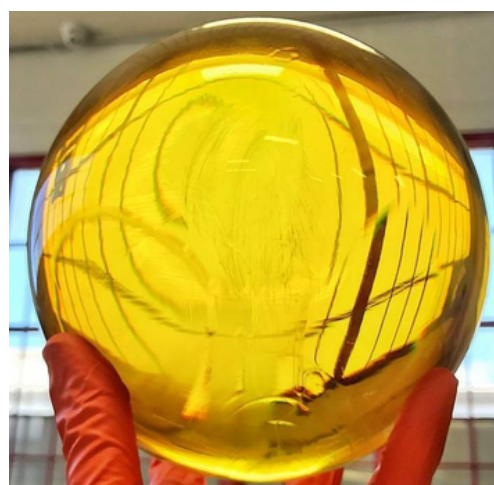

Terpenes are all natural compounds, derived from botanical sources, responsible for creating a wide range of aromas, scents, and tastes. Each compound and formulation is tested for pesticides, metals, and contaminants.

3&4

5

RAW OIL

Each batch is tested for potency, pesticides, heavy metals, and other contaminants before terpenes are added.

AAA GRADE - FLAVORLESS

AA GRADE - SWEET

A GRADE - FLORAL

B GRADE - PUNGENT

B GRADE - BITTER

C GRADE - BURNT

TASTE & VISUAL

Each batch of raw oil is inspected and tested to ensure it is of the highest quality for scent, taste, and visual appearance. This means the best oil that is flavorless, light golden AAA grade distillate.

6&7

8

FORMULATED OIL

After the oil is mixed, it is tested again for potency and contaminants to ensure consistency, safety, and our high standard of quality.

FILLED CARTRIDGE

To ensure that oil doesn't have harmful contaminants, we thoroughly monitor and test the oil in filled cartridges over time. There is never a drop in quality due to inspections that meet our high standards!
